## REMEMBER THE SKIN OF YOUR YOUTH?

Your healthy glow gave you a confident smile. Then everyday life changed your skin. If left untreated, skin becomes drab, and lackluster.

- 1 Stress
- 2 Pollution
- 3 Sun Damage
- 4 Poor Diet

## THE GOOD NEWS...

Glowing vibrant skin is now possible with Erbium Laser Skin Resurfacing by Alma Harmony. Erbium laser can help restore the youthful appearance to wrinkled, sun-damaged skin.

The Erbium laser, today's most popular skin resurfacing laser, is a gentle option for laser skin resurfacing. It is ideal for those who want significant and immediate change in skin texture and tone, but have little time for prolonged healing periods. Erbium laser treatments have rapid healing times and shorter periods of redness than other ablative treatments.

### WHAT IS ERBIUM LASER?

Erbium laser helps to smooth fine lines and wrinkles. The outer layers of damaged skin are ablated by laser, while the lower layers are toned, for a smoother, firmer look. Erbium Laser can reduce the appearance of fine lines and, in some cases, improve skin texture.

### WHAT CAN I EXPECT DURING TREATMENT?

The adjustable Erbium laser can be tailored to the particular needs of each patient. By gently ablating the epidermis, the laser selectively targets tissue to significantly improve various aesthetic imperfections. The ablated tissue sloughs off and is replaced by a fresh new skin.

### DOES IT HURT?

Far more comfortable than conventional laser skin resurfacing, the Erbium laser is performed with topical anesthetic at physician's discretion.
