

Noticeable veins on your face and legs can be a source of anxiety and embarrassment. With just a few quick and gentle cosmetic laser treatments, these veins can **VIRTUALLY VANISH** from sight.

The Harmony laser by Alma utilizes advanced laser technology with a proven safety record. The laser's parameters are specially designed to match individual skin types. This means that patients of **ALL SKIN COLORS** can be treated safely and effectively. The laser precisely targets the problem veins while leaving the skin unharmed. After the treatment, the blood vessel will fade and disappear.

The Harmony laser by Alma can treat **A VARIETY** of small to mid-sized veins, from superficial to deep, including:

Spider Veins:
Small, red veins near the surface of the skin

Reticular Veins:
Small, bluish colored veins

During your consultation, your treatment provider will examine your veins, discuss your goals and **DEVELOP A TREATMENT PLAN** awith you.

FREQUENTLY ASKED QUESTIONS

HOW LONG DOES A LASER VEIN TREATMENT TAKE?

A treatment can take as little as a few minutes for a small area and up to 30 minutes for a larger area.

HOW MANY TREATMENTS WILL I NEED?

Your provider will work with you to develop a treatment program to meet your goals. Depending on the size of the vein and the area of your body on which it appears, multiple treatment sessions may be necessary.

HOW CAN I PREPARE FOR A LASER VEIN TREATMENT?

Your treatment provider will give you specific instructions to follow before your treatment. It is generally recommended that patients use sunscreen daily and limit sun exposure for a few weeks before and after treatment.

WHAT CAN I EXPECT DURING THE TREATMENT?

Most patients find the laser treatment to be very comfortable. Typically, anesthesia is not required although topical anesthetic is an option for sensitive areas.

WHAT CAN I EXPECT AFTER THE TREATMENT?

Your provider will give you specific post-treatment instructions. While your skin may be slightly red immediately after the procedure, this should resolve within a few hours. You can resume your normal activities immediately following the treatment.
